

Florida Agency Network boasts its very own network of eNotaries that are all title professionals to handle your RON eClosing. With our network on your side, let's dispel some of the common myths surrounding eClosings:

RON eClosings aren't as secure as signing on paper in an office.

It's MORE secure with multi-factor ID verification. A digital copy of your photo ID and a personal data questionnaire at the start of your RON session eliminate any factor of human discretion.

The ID Verification is too difficult to pass.

You will receive a series of personal questions to answer, they're pulled from your history. If, by chance, the verification quiz times out or there are too many errors - our title professionals will take care of YOU!

Ron eClosings require the newest iPhone/Pad/Tablet/Laptop.

The platform used by FAN's experienced title professionals is accessible to most devices with an internet connection and a camera. But we will work make sure you have everything you need and setup properly before the time of closing

I have to be young and tech-savvy to do a RON eClosing.

Anyone can close with RON! Our title professionals can walk you through every step – from setting up your closing appointment, joining the closing, and reviewing your documents.

Agents won't be able to attend the RON eClosing.

Yes, THEY CAN!
